

Product Information & Warranty Guide

Version 2.1 | Last reviewed: January 2025 | Owner: Customer Experience

1. Warranty Coverage All products carry a minimum 12-month manufacturer's warranty from the date of purchase. Premium and Pro range products carry a 24-month warranty. The warranty covers defects in materials and workmanship under normal use.

2. What the Warranty Does Not Cover The warranty does not cover damage caused by: accidental damage, misuse, unauthorised modifications, normal wear and tear, liquid damage, or damage caused by use outside the product's intended purpose.

3. Extended Warranty Customers may purchase an extended warranty at the point of sale or within 30 days of purchase. Extended warranties add 1 or 2 additional years of coverage and include accidental damage protection.

4. Voltage & International Use Most of our electronic products support dual voltage (100-240V, 50/60Hz) and can be used internationally with the appropriate plug adapter. Check the product label or specifications sheet for voltage details. Single-voltage products must not be used outside their rated voltage range.

5. Compatible Accessories We recommend using only manufacturer-approved accessories with our products. Using third-party accessories may void the warranty. A full list of compatible accessories is available on each product page.

6. Product Specifications Detailed specifications for all products, including dimensions, weight, materials, and technical data, are available on the product listing page and in the included product manual.

7. Software & Firmware Updates Smart and connected products receive free firmware updates for a minimum of 3 years from the launch date. Updates are delivered automatically when the device is connected to Wi-Fi.

8. Safety Certifications All safety & products comply with relevant safety standards including CE, UKCA, and RoHS directives. Certification documents are available on request.
